

Dora Tomulic

Artist Statement

I love visual story telling. Each of my paintings is a mystical world in itself, full of iconography developed from personal symbolism. Although at first glance the paintings appear to be abstract, careful observation reveals subtle figuration.

Fantastic creatures float in a seemingly kaleidoscopic space, integrated—often with humor—into complex visual metaphors.

My works are explorations of patterns of movement, dynamical systems, and chaos. I observe chaos not as the antonym of order, but as a prerequisite to order. The chaotic motion gives rise to ordered structures—it explores swirls, spinning and curving, or dizzying diagonal trajectories to create an infinite source of spatial relations.
